DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct sub-species of the claimed invention. It is the Examiner's position that Figures 1, 2, and 16 are the general descriptive embodiments of Applicant's device. However, upon obvious election of these Figures the Examiner requires that Applicant elect one of the sub-species of the steering assembly of the claimed invention:

- | | | |
|--------------------|---------------------|--------------------|
| A. Figure 3; | B. Figures 4, 5a-c; | C. Figures 6a-c; |
| D. Figures 10a-b; | E. Figure 11; | F. Figures 12, 13; |
| G. Figures 14, 15; | H. Figures 17, 18; | I. Figures 19a-c; |

2. Upon election of one of the steering assembly sub-species indicated above that contains a spring assembly, Applicant is hereby further directed to formally elect the further sub-species of the two piece offset spring assembly if it is a part of the compound steering assembly and Applicant wishes consideration:

- a. Figures 7, 8, 9;

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed sub-species and/or a further sub-species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

4. Applicant is advised that a reply to this requirement must include an identification of the sub-species and/or a further sub-species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument

Art Unit: 3763

that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional sub-species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected sub-species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the sub-species and/or a further sub-species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
